

An aerial photograph of a vineyard on a hillside. The rows of grapevines are arranged in a grid pattern, following the contours of the slope. The vines are lush green, and the ground between the rows is a mix of brown soil and some sparse vegetation. The background shows a dense forest of trees on a steeper slope.

Environmental Sustainability

ZŠ Lupáčova

Enviromental Education

- Students of senior classes can teach young pupils how to separate different kinds of waste using games and funny activities.
- Kids should encounter with nature

How to Teach Kids to Respect the Environment

Why should kids encounter with nature?

- Kids are the future of the society, so if they have good relations with nature, it may be still here for their kids.

Reusable boxes and bottles

- Stop using plastic dishes
- Reuse boxes and bottles
- Don't buy plastic bags every time you go shopping

What can you use instead of plastic things

- Reusable cotton bags
- Reusable boxes for your snacks
- Reusable dishes for your lunch
- Reusable bottles for your drinks

My mess my responsibility

- Everyone should clean up their mess, because no-one else wants to clean it
- If everyone acts like those people who are throwing trash everywhere our planet will soon look like that. (in the picture)

How to act to be responsible?

- The meal package you've used can be just a piece of waste if you throw it into the garbage bin and it is the right thing to do. The same package becomes litter when it occurs on the road or on the pavement.
